

Stylish aesthetics for design-oriented

Flush skirting boards
The revolutionary idea for your
living and work space!

AGS systems

The innovative building technique for superior standards

Functional fitting due to a unique plug system

The flush skirting meets plain, timeless elegance with comfort and modern well-being in your own home. Suitable for solid and dry construction.

Annoying dusting of the skirting board upper edge and thus also the resulting wiping marks on the walls belong to the past.

Since there is no direct contact between floor, skirting and brickwork, there will be no floor vibrations transmitted.

Quick and easy assembly through the patented plug-system with corresponding corner and linear connectors. This eliminates the need for time-consuming meter cut.

The skirting profile is applied directly to the raw brickwork before the plasterwork. The top edge conducts as a guideline for the vertical and horizontal work. That simplifies the plasterwork and saves valuable time when setting the edges.

New standards in material selection: from the classic wooden types up to aluminum and stainless steel, dirt-repellent surfaces, Corian, Carbon and many more.

Indirect lighting with LED stripes in the skirting boards allow new design of the possibilities in the lighting engineering.

Also possible to use the skirting boards for steps, landings, stairs and curves. Simple but perfect.

it is so easy:

- cut the profiles to size
- attach corner pieces
- mounting adhesive on rear side spread over the entire surface
- align with height
- fix
- before laying the floor covering Remove protective film
- insert skirting board
- that's it!

Harmonious perfection
clear lines

Visible skirting boards for Light model

WHITE RAL 9010/RAL9016 Art.no. 40080	
ALUMINIUM-LAMINATE Art.no. 40500	
STAINLESS STEEL-LAMINATE Art.no. 40510	
Further solid wood slats in oak, walnut and many more.	

PRODUCT RANGE

Aluminum profile for wooden skirting boards

MASONRY		DRYWALL	
PROFILE LIGHT 46 length: 2m height: 46mm depth: 15mm max. material depth: 9,7mm Art.no. 10046		PROFILE LIGHT 46 length: 2m height: 46+25mm depth: 15 bzw. 13,5mm max.material depth:9,7mm Art.no. 10045
